## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Shibata (US Patent No. 6,734,556).

Shibata teaches an article formed by wire bonding a first chip to a second chip (column 2, lines 34-47); (note the examiner interprets the second chip to be functionally equivalent to the applicants claimed substrate). Said article comprising: a metallic wire material (i.e., gold wire), (column 4, lines 62-64); a metallic interconnect made of copper metal within said substrate (column 4, lines 57-60); an alloying metal made of tin deposited directly on said metallic interconnect, said alloying metal comprising alloying (i.e. said tin) metal other than said metallic wire material (i.e. said gold wire), (column 4, lines 18-20), and a resultant alloy material made of gold and tin (i.e. Au-Sn), formed between said interconnect and said metallic wire connected to said first chip (column 4, lines 18-23 and lines 54-64), said resultant alloy material formed between said metallic wire material and said alloying metal, and formed when said metallic wire is in contact with said metallic interconnect under temperature, pressure (column 4, lines 18-23), wherein said resultant Au-Sn alloy has a low melting point, thereby allowing the bonding

to be performed at a lower temperature, hence low thermal energy input required in said bonding process ( column 4, line 65-column 5, line 6).

### ***Response to Arguments***

3. The examiner acknowledges the applicants' amendment received by USPTO on November 19, 2007. Claims 1-5 and 21 are remains under consideration in the application.
